Day Two

Day Two Topics

- HTML Forms
- HTML Tables
- Introduction to CSS

HTML Forms

HTML Forms

used to collect data from the user. Inputs such as name, email addresses, phone numbers, etc.

HTML Forms

HTML Forms - basic fields (More types on actual examples)

HTML Tables

HTML Tables

used to arrange data like text, images, links, other tables, etc. into rows and columns of cells.

Trivia: Tables have existed as part of the web standards since the HTML 3.2 standard (January 1997). That's 24 years ago!

	料金 102,000円~	ITクラス	英語クラス	宿泊
Kredo	最低1週間~ ※ 最低1ヶ月からのご留学をオススメしております	教育のスキルを兼ね揃えた教員による英語での授業 3~5人/少人数/1日4時間	マンツーマン授業 2時間 グループ授業 2時間	経済特区ITパーク内 校舎から 徒歩5分の高級コンドミニアム
A社 (セブ島)	230,000円 ~ 最低3週間~	日本人講師による授業 5~10人 / 大人数 / 1日3時間	マンツーマン授業2時間 グループ授業1時間	校舎から車で10分のコンドミニアル
B社 (セブ島)	280,000円 ~ 最低4週間~	現役エンジニアによる英語での授業 5~10人 / 大人数 / 1日4時間	マンツーマン授業4時間	校舎から徒歩15分のホテル
C社 (アメリカ)	230,000円 ~ 最低4週間~	現役エンジニアによる英語での授業 20~30人 / 大人数 / 1日2時間	グループ授業 2 時間	校舎から車で10分の学校寮

HTML Tables

- HTML Tables
 - o Tags:
 - table main tag for the table
 - thead specifies the head
 - tbody specifies the body
 - tfoot specifies the footer
 - tr creates a row
 - th row intended to be header
 - td table data

GREEN -- optional

```
<thead>
   </thead>
 <tfoot>
   </tfoot>
```

HTML Tables

HTML Tables

```
<thead>
     <t.r>
        Product/Service
        Description
        Availability
        Price
     </t.r>
   </thead>
   <img src="images/car.jpg" alt="This
is a picture of a red car." height="200" width="300">
           <br/>
<br/>
Red Car
        </t.d>
        Color red car from Toyota.
        Always
```

> What is CSS?

Cascading Style Sheet

- Language used for describing the presentation of an HTML document
- Cascading comes from the specified priority scheme used to determine which style rule applies if more than one rule matches a particular element. This cascading priority scheme is predictable.
- Developed by Håkon Wium Lie, Bert Bos, and the World Wide Web Consortium on Dec 1996 (24 years ago).

WWW C Logo

Ice breaker

- What is your favorite website?
- Why do you like it?

- > CSS Types
 - o Inline CSS declarations written as an attribute of the HTML element
 - <div style="background-color:blue"></div>
 - o Internal CSS declarations at the head element of the HTML document
 - Uses <style></style> element inside head
 - External CSS declarations written in a separate file
 - link rel="stylesheet" type="text/css" href="css/main.css">

> CSS Syntax

</style>

```
Selector
          Property
                       Value
 div {
    background-color: blue;
 <div style="background-color: aqua;">This is a div inside a paragraph/div>
 <style>
        div {
            background-color: green;
            font-size: 10px;
```

> CSS Selectors

Element

<div>This is a div selected via element name.

CSS:

HTML:

```
div {
background-color: green;
}
```

Selects all elements in the page with the name div

Class

HTML:

```
<div class="banner">This is
a div selected via
class.</div>
```

CSS:

```
.banner {
background-color: green;
}
```

Can select multiple elements per page

ID

HTML:

```
<div id="unique">This is a
div selected via id.</div>
```

CSS:

```
#unique {
background-color: green;
}
```

Identifies one element in a page

CSS Selectors - basic patterns

```
HTML:
<div>
<span>Selects all</span>
spans inside a div.
</div>
CSS:
div span {
background-color: green;
```

```
HTML:
<div>
All elements are selected.
</div>
CSS:
background-color: green;
```

```
HTML:
<div>
All divs and paragraphs are
selected
</div>
Paragraph here.
CSS:
div, p{
background-color: green;
```

HTML:

```
<a href="index.html>"
Home
</a>
```

CSS:

```
a:hover {
background-color: pink;
}
```

Style is applied when cursor is above the selected element.

HTML:

```
<input type="text"
name-"firstname" id="name">
```

CSS:

```
#name:active{
background-color: yellow;
}
```

Style is applied when the element is clicked or the cursor is inside the input box.

HTML:

```
<a href="index.html>"
Home
</a>
```

CSS:

```
a:visited {
background-color: pink;
}
```

Style is applied when the link is already visited.

CSS Comments

The CSS comment is used to add notes to CSS contents. It can explain your code, add points of improvements, descriptions, and provided copyright information.

```
/* I am a CSS comment */
For mac:
```

CMD + /

For windows:

CTRL + /

Homework

- Select colors that will be used for your Carshop Company website
 - You can draw inspiration from existing websites

Topics for tomorrow

- CSS Typography
- CSS Lists
- CSS Images
- CSS Length Units
